Internship JD – Devops Intern

A DevOps Intern supports the engineering team in automating, managing, and improving infrastructure workflows. This role combines scripting, cloud infrastructure, and DevOps practices, providing hands-on exposure to modern tools and practices.

Key Responsibilities:

- Infrastructure as Code (IaC): Assist in creating, modifying, and managing infrastructure using Terraform.
- Scripting & Automation: Write and maintain automation scripts using PowerShell (bonus: Python/Bash).
- Managed Support: Provide first-level support and troubleshooting for infrastructure and applications.
- Monitoring: Assist in setting up, monitoring, and alerting for cloud and on-prem infrastructure.
- Cloud & Systems Management: Support in provisioning, scaling, and maintaining resources on AWS/Azure.
- CI/CD Pipelines: Help configure, optimize, and troubleshoot build/release pipelines.
- Documentation: Maintain detailed documentation of support issues, monitoring metrics, and infrastructure processes.
- Collaboration: Work closely with development and operations teams to ensure smooth system performance.

Skills & Tools:

- Tools/Platforms: Terraform, PowerShell, Git/GitHub, Azure, AWS (preferred).
- Monitoring Tools: Basic knowledge of tools like CloudWatch, Azure Monitor, Prometheus, Grafana, or Nagios.
- Support Skills: Strong troubleshooting ability, incident handling, and root cause analysis.
- Knowledge Areas: Infrastructure as Code (IaC), cloud fundamentals, system administration.
- Scripting Skills: Familiarity with PowerShell (additional scripting languages a plus).
- Soft Skills: Problem-solving mindset, communication, and ability to handle pressure in support scenarios.

Common Related Job Titles:

- DevOps Intern
- Cloud Infrastructure Intern
- Site Reliability Intern (SRE Intern)
- Automation Engineer Intern
